LEAD SERVICE LINE INVENTORY

As part of the revision, all water systems must develop an initial inventory of all service lines connected to

System Information	
Water System Name	Waynesboro Water System
PWSID #	TN0000736
Total connections #	1947
Contact Information	
Name	Timothy Wallace
Title	Water Plant Manager
Phone	931-722-5458
Email	waterplant@cityofwaynesboro.org

The following list of sources of information <u>must</u> be reviewed when competing the LSLI:

- Distribution system maps and recorded drawings
 Information collected for the presence of lead and copper as required under the Code of Federal Regulations (CFR) 40 CFR 141.42. 2
- V Capital improvement plans and/or master plans for distribution system
- V Current and historical standard operating procedures and/or operation and maintenance (O&M) manuals for the type of materials used for service connections
- 4 Utility records including meter installation records, customer complaint investigations, and all historical documentation which indicate and/or confirm the location of lead service connections
- Existing water quality data for indications of "troubled areas"
 Optional sources of information

- Interviews with senior personnel V
- Conducted service line sampling where lead service lines are suspected to exist but their presence is not confirmed
- V Review of permit files
- Community survey 1
- V Review of USGS maps and records
- 4 Interviews with pipe suppliers, contractors, and/or developers

*All sites must have unique location idenitfier information.

Sites with Lead or Galvanized previously downstream of Lead may be added to the Master Sampling Site List (MSSL) and may require additional information.

Submit completed form to: DWRwater.compliance@tn.gov

Select the **Service Line Inventory** tab to

complete form

MSSL Tier	CWSs	NTNCWSs
Tier 1	SFSs served by LSLs. MFRs if they represent ≥20% of structures served	Buildings w/ LSLs
Tier 2	Non-Residential Buildings and MFRs served by LSLs.	N/A
Tier 3	SFSs with galvanized service lines downstream of an LSL, currently or in the past known to be downstream of a lead connector.	SFSs with galvanized service lines downstream of an LSL, currently or in the past known to be downstream of a lead connector.
Tier 4	SFSs with Cu pipes w/ Pb solder installed before July 1988, the effective date of the State's Pb ban	N/A
Tier 5	Representative sample where the plumbing is similar to that used at other sites served.	Representative sample where the plumbing is similar to that used at other sites served.

CWS = community water system

NTNCWS = non-transient non-community water system

LSL = lead service line

SFS = single family structure MFR = multi-family residence

N/A = not applicable
